### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The present claims are deemed allowable over the prior art of record in that the latter neither anticipates nor renders obvious the combination of a polymer comprising repeat units corresponding to the presently recited formula 1 with a nylon polymer. The closest prior art of record, US 5,880,235 (Schwind et al), is directed to copolymers obtained by polymerizing exomethylene lactone monomers with at least one other vinylically unsaturated monomer. The reference, however, neither discloses nor renders obvious blending said resin with a nylon. Accordingly, the present claims are deemed allowable over the prior art of record.

With respect to the provisional obviousness-type double patenting rejection over 10/766,412, a provisional obviousness-type double patenting rejection over the present application will be considered upon examination of 10/766,412. The present application is, therefore, allowed with the proviso that a provisional obviousness-type double patenting rejection will be made in the copending application if still deemed pertinent.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR

Art Unit: 1711

1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

In claim 20, lines 20-21, the language “; and R<sub>9</sub> is hydrogen, hydrocarbyl or substituted hydrocarbyl” has been deleted.
